Animals

A orangutan female only have 1 baby 1 or 2 years and they spend most of their time in trees and they make nests from vegetation. Bonobos, These peaceful apes live in tropical rainforests in Congo. Southern primates eat leaves, fungi, fruit, vines and berries.

A jaguar ~~is~~ is panther and hunters and half of them live in Brazil.

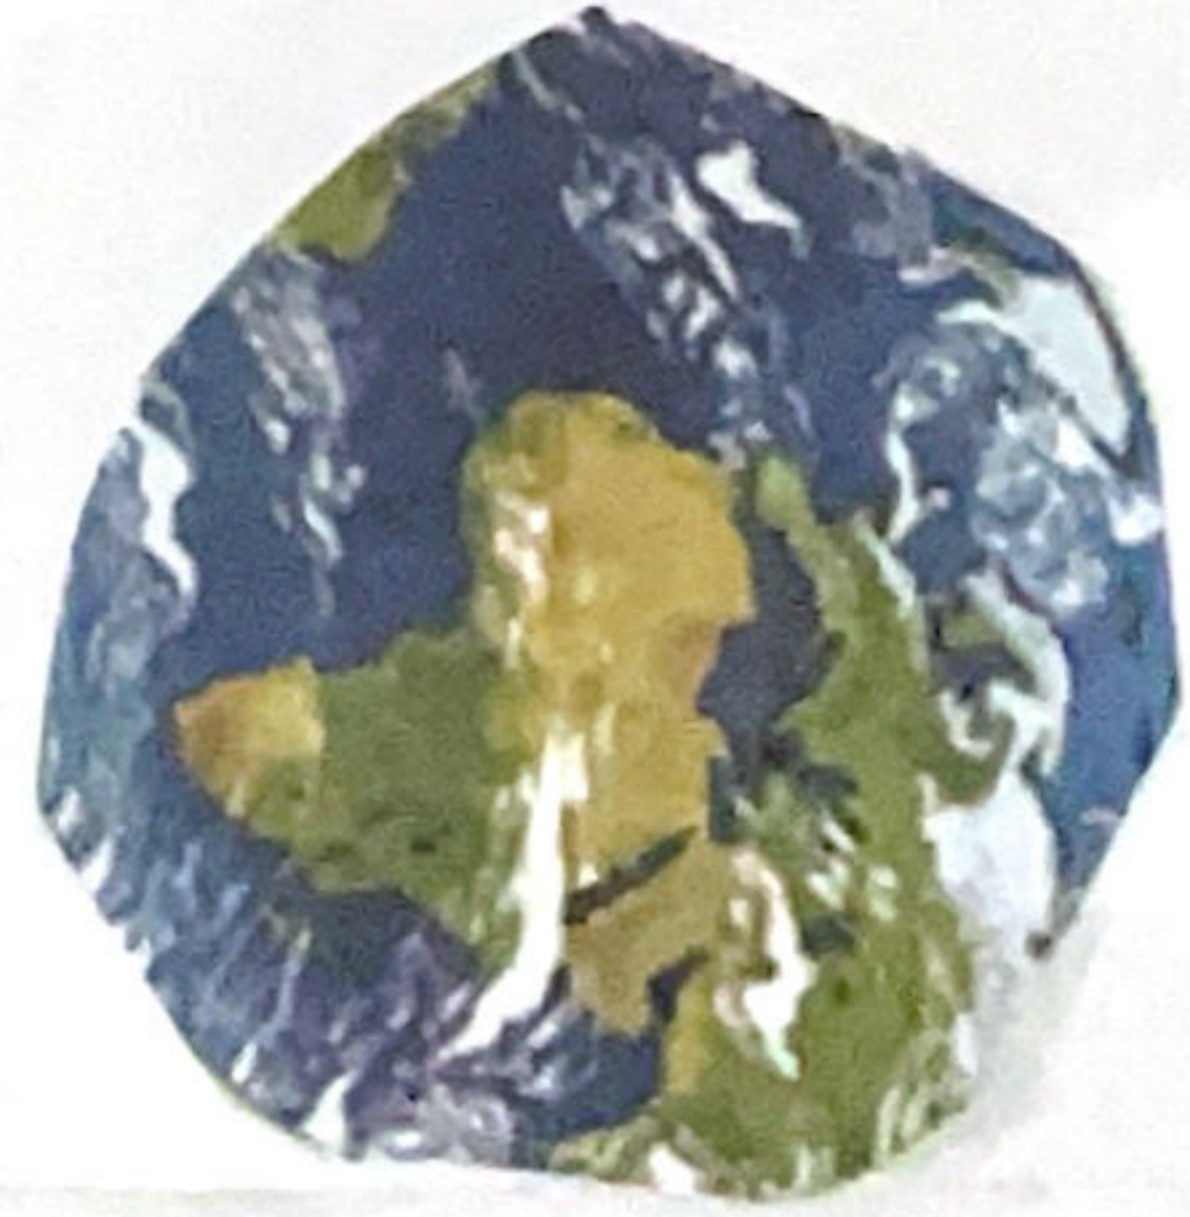

The Amazon Rainforest

by Carter

more than 30 million people - including 350 indigenous tribes that speak 170 different languages - live in the Amazon rainforest. They depend on the Amazon for agriculture, clothing, and traditional medicines. In the year 1500 there were between 5-9 million indigenous peoples living in the Amazon rainforest.

Types of rainforests By Frelle

Tropical R rainforests
Temperate R rainforests

Tropical rainforests are warm, wet and sunny and are also perfect for growing conditions. There is lots of plants, thick trees and thousands of animals.
Temperate rainforests are ~~warm~~ cooler than and less hot than tropical rainforests as well as that they are near the ~~seaside~~ coastlines but lots of animals still live there.

What do the tribes do in the
Muzong by Kyranth

In forests the tribes will eat wild
Snakes and other animals.

They have 400 tribes in the area.

They hunt good with bows.
